

电熨斗安装件气密测试仪

Electric Iron Built-in Part Leak Tester

1. 产品名称：电熨斗安装件气密测试仪
Product Name: Electric Iron Built-in Part Leak Tester

电熨斗安装件气密测试仪
Electric Iron Built-in Part leak tester

2. 用途：对电熨斗安装件进行气密检测
Application: Leak testing of Electric Iron Built-in Parts

3. 主要功能和特点：

Functions and Specifications

- 攻克了超低压测试的技术难点
Conquer the technical difficulties in ultra-low pressure testing
- 同时检测电熨斗3个腔体的密封性
Simultaneous testing of leak of 3 cavities of the electric iron
- 采用双启动按钮，确保操作的安全性
Double-button start, ensuring operation safety

电熨斗
Electric iron

4. 核心器件：FL-295CUL型气密检漏仪
Main Instruments: FL-295CUL Air Leak Tester

5. 测试节拍：0.3min/件
Testing Rate: 0.3min/pcs

耐久试验台

Durability Test Bed

1. 产品名称：耐久试验台
Product Name: Durability Test Bed

2. 用途：用于阀门、调温器、开关、门等活动部位耐久性试验。
Application: Durability tests for non-fixed parts such as valves, thermolators, switches and doors

微波炉门耐久试验台
Microwave oven door durability test bed

3. 主要功能和特点：
Functions and Specifications

- 可以任意设置循环次数1~9999999次
Cycle number 1~9999999 times, to be set at will

旋塞阀门温度寿命测试台
Stopcock valve temperature and life test bed

- 可设定旋转角度等参数
Parameters such as rotation angles can be set
- 在整个测试环节多参数监控（温度、压力、扭矩、次数等）
Multi-parameter monitoring throughout the testing process (temperature, pressure, torque, times, etc.)
- 测试过程自动报警
Automatic alarm during testing
- 可同时测试多个工件
Simultaneous testing of multiple work-pieces
